Subject: Setting permit limits for ID. dischargers on Spokane River

Hi Jim,

I would like to talk with you soon regarding EPA's process for setting limits in Idaho permits. Based on the email between Brian Nickel and Dave Moore, I understand you are the lead manager for this issue. I am picking this matter up in Mike Lidgard's absence (b) (6) as it is time sensitive for us.

Let me know who you want to have involved for a discussion (e.g., just you and I or a larger group) and I will take a lead in establishing a teleconference. To help further our discussion, I have attached a draft proposal for the criteria EPA would use in setting limits. Thanks Jim.

Dave
